Fair to pay the right fee

It is a question of fairness to pay the correct fee for placements in Preschool, Day Care and other education services. Therefore Arboga council has decided that, from and including 2016, it should conduct financial checks on all applications.

We will be checking all financial information sent in to us for day care placements against the household's taxed income with the Swedish tax office (Skatteverket).

Most people do pay the correct charges and are not going to be affected by this change. There are, however, those who have left financial information with us that indicates a lower, or higher, income than has been declared to Skatteverket. The adjustments will be made the following year, when the householder will receive an invoice or repayment that pertains to the year in question. Payments under 600 kronor will not be invoiced or repayed.

These financial checks will be performed with a 2 years delay as the required information from Skatteverket has not been made available earlier.

More information can be found at: questions and answers about financial checks, ([vanliga frågor och svar om avgiftskontrollen](#)).

This information is also available in other languages.

Parents and guardians with questions around these financial checks can contact Arboga's Child and Education Department. (Arboga kommun, barn- och utbildningsförvaltningen):
